environmental

Summary

We are currently seeking to recruit a Customer Service Engineer who is looking to develop their career within an international dynamic SCADA and Telemetry company. With us you'll be working within a dynamic customer service department and be an important member of the team. You'll find that we expect you to take on responsibility and make a genuine contribution to our company.

Serck Controls is based in Coventry in the West Midlands and is a member Serck Controls Pty with its HQ in Australia. Serck Controls supplies the international utility marketplace with high technology data acquisition and control products, systems and services. These systems monitor and control distributed resources such as Oil, Gas, Water and Electricity Services.

Our Service Engineers provide support for customers with Serck

Controls' computer based control and data acquisition systems both in the UK and worldwide. Specific work areas include: System failure diagnoses, Customer support technical help, Maintenance site visits, remote system diagnostics and Hardware failure diagnostics. Working with both PC and DEC Alpha platforms. Applying SCADA outstation application knowledge to resolving issues.

The position is available for individuals who:

- Have the ability to work individually without supervision
- Have the ability to work as part of a team
- Can work to deadlines
- Have good communications skills
- Are flexible
- Hold a full UK driving licence

Knowledge of SCADA and/or PLC's and control systems would be an advantage.
